Education

Master 2 - Paris-Saclay University - Institut Polytechnique de Paris, Saclay

📅 2025 - 2026

Optimization, Games and Control. Pursued concurrently with the third year at ENSTA Paris.

Advanced coursework in Optimization and Operations Research, Optimal Control and Decision Processes, Machine Learning and Complexity, including Discrete Optimization, Integer Optimization for Machine Learning, Derivative-Free Optimization, Optimal Control of ODEs, Markov Decision Processes, Tropical Algebra and Games, Deep Learning, and Complexity Theory.

Master 1 - Paris-Saclay University - Institut Polytechnique de Paris, Saclay

📅 2024 - 2025

Applied Mathematics. Double degree with the 2nd year at ENSTA Paris.

Advanced coursework in functional analysis and spectral theory, numerical analysis of PDEs and finite element methods, probability and stochastic processes, statistical modeling, optimization and systems control, operations research, and scientific computing, including Markov chains, discrete-time martingales, numerical simulation, high-performance computing (HPC), and numerical linear algebra.

Master of Engineering - ENSTA Paris, Palaiseau

📅 2023 - 2026

France's top 5 ranked school for science and engineering, founding member of the Polytechnic Institute of Paris
Mathematics, Computer Science, Physics, Economics, Management/Project Management, Law, Languages, Sports.
Specialization in Applied Mathematics.

Classes préparatoires - Lycée Marcelin Berthelot, Saint-Maur-des-Fossés

📅 2021 - 2023

2-year intensive program to prepare for the nationwide competitive entrance exams to top French engineering schools (first two years of a bachelor degree : Mathematics, Physics-Chemistry, Computer Science, Engineering Science)

Lycée - Lycée Étienne Bezout, Nemours

📅 2018 - 2021

Hhigh school/secondary diplomas and certificates with highest honour.

Experience

Master's thesis - University of Padua

📅 May-October 2026

The Shrödinger system and stability of entropic optimal transport, under the supervision of Professor Giovanni Conforti.

Reasearch intership - Institut de Physique du Globe de Paris

📅 June-August 2025

The aim of this research project was to assess the potential of a new passive seismic imaging technique for the subsurface.

Workman intership - Village potager, Saint Pierre lès Nemours

📅 July 2024

Packaging, order preparation, market gardening.

Citizen engagment

📅 2023 - 2025

- Leading of a robotics course ("Semaine de la Robotique") for secondary school students. 📍 Palaiseau
- Cordées de la réussite : creation and running of scientific and cultural activities for middle school students. 📍 Trappes

Skills

Computer science

Bash C/C++ Python Matlab $\LaTeX$ Linux GIT

Projects (some)

C Reinforcement learning (Q-learning, Sarsa).
C++ Traveling Salesman Problem (genetic algorithms).
Matlab Rayleigh-Bénard Convection (fluid mechanics).
TIPE Granular media and the urban construction supply chain (mechanics - mathematics)
